i-gum™

Only great ideas stick

Removing gum with ease. **Battery or gas powered.**

A comfortable self contained backpack is worn by the user allowing for complete freedom of movement and easy usability.

The unit is attached to an ergonomic lance designed specifically to ensure fast, reliable and easy operation with maximum chewing gum removal. At the point of contact, our specially designed brush emits a pH neutral and safe enzyme steam mixture to dissolving the chewing gum, which can then be brushed away. Beside the comfortable harness you also have the option to wheel it!

i-gum battery

Safe to touch

Designed to be user-friendly and to work in different environments, there are no hazardous or dangerous fumes or heat present when working with the i-gum.

i-gum B

Battery powered or fueled by gas canisters?

Choose between an i-power battery powered i-gum machine, or a gas canister fuelled machine.

i-gum G

No water or power supply

To operate the machine, just point the lance to the area or stains that need to be cleaned and watch the i-gum perform its magic.

Centralized controls

Centralized controls are located in the head of the machine. All of your actions, switches and controls are within the reach of your fingertips.

6 seconds is all it takes

The i-gum apparatus only needs 6 seconds to eliminate any unwanted sticky materials (chewing gum / stickers / lining glue). Increase your efficiency and start cutting down on waiting hours.

No matter which surface

Hardwood, soft floors, tarmac, doors, cabinets, plywood, concrete or steel. The i-gum operates at maximum capacity, and removes sticky residue anywhere and everywhere.

Key features
